

Inter-Office Council for Assessment of Traffic and Safety Norms

Appointed by the Director General, Ministry of Transport

Our ref. 95318-09

June 15, 2009

To:

Mrs. Iris Shem-Tov
IRIFLEX
P. O. B. 267
Kiriath Motzkin 26115

Dear Madame,

Re: White and Yellow Retroreflectors, model "Iriflex"
Reference – resolution of the Council dated June 08, 2009

1. Hereinafter the resolution of the Council of June 08, 2009 in regards to the device in reference.
2. Two samples of the retroreflectors have been submitted to us: yellow and white.
3. Mr. Salim Wabi explained that the two devices were in the past incorporated in the list of approved devices of the Council. The suitability tests for the new specification were not performed in due time, consequently, their validity was not extended in 2009 and now these are evaluated as new devices.
4. Eng. Avi Cohen explained that the devices complied with all the tests as per the new specification, including the load test. The reflection level exceeds the requirements of the USA norm. Both devices have entirely satisfied the requirements of the specification.
5. Decision:
The Council approves the retroreflectors in yellow and white for use in Israel for a period of 3 years only. This certificate is subject to the publication of the technical specifications and installment instructions at the internet site of IRIFLEX.

Yours faithfully,

Salim Wabi (-)
Coordinator, Inter-Office Council

Cc; Eng. Yeshayahu Ronen
